All relevant criteria in the ASI Performance Standard were included in the Audit Scope.

Re-Certification and Scope Change Audit (6 -7 June 2023)

The Audit Scope covered the production of extrusion billets from Recycled Aluminium Scrap.

Supply chain activities included in the Audit Scope:

- Aluminium Re-melting/Refining
- Casthouses

All relevant criteria in the ASI Performance Standard were included in the Audit Scope.

Surveillance Audit (7 May 2024)

The Audit Scope concentrated on verifying the Corrective Actions taken to address non-conformities and the weaker areas of the Management System identified in the previous Audit.

Supply chain activities included in the Audit Scope:

- Aluminium Re-melting/Refining
- Casthouses

Criteria in the ASI Performance Standard that were identified as non-conformities from the previous Audit were included in the Audit Scope.

AUDIT OUTCOME

- Certification

AUDIT METHODOLOGY
DECLARATION

The Auditors confirm that:

- The information provided by the Entity is true and accurate to the best knowledge of the Auditor(s) preparing this report.
- The findings are based on verified Objective Evidence relevant to the time period for the Audit, traceable and unambiguous.
- The Audit Scope and audit methodology are sufficient to establish confidence that the findings are indicative of the performance of the Entity's defined Certification Scope.
- The Auditor(s) have acted in a manner deemed ethical, truthful, accurate professional, independent and objective.

If you have an inquiry or complaint about this Certification, go to the third-party EthicsPoint portal at: <https://Aluminium-stewardship.ethicspoint.com/>

EthicsPoint is a comprehensive and confidential reporting tool that enables complaints to be securely raised, managed and responded to. This enables anonymity to be maintained where desired by complainants, or as relevant to whistleblowing situations.

Information is available in five languages – English, French, Chinese, German and Portuguese (Brazil). Translation services provided by EthicsPoint enable complaints and correspondence to be managed in multiple languages.

ENTITY OVERVIEW

The Speedline Aluminium Gießerei GmbH facility in Austria (the 'Entity') has a total annual capacity of 96,000 tonnes of alloy (approximately 6,000 extrusion billets) and is known for being one of the most modern and efficient Aluminium re-melting plants in Europe. It is part of the Alu-met Group and The Entity has been continuously optimised since its opening in 2008. There are currently over fifty employees on site and the area under management is approximately fifty hectares. The Entity is focused on improving capacity, safety standards, and energy efficiency while reducing emissions levels.

MATURITY RATINGS

A rating of maturity (low, medium or high) determined by the Auditor that provides a general assessment in terms of systems, Residual Risk and performance assigned to a Sustainability Component.

Maturity ratings are not a direct assessment of conformance to the Standard.

	GOVERNANCE	ENVIRONMENT	SOCIAL	COMBINED RATING

RISKS	Medium	Medium	Medium	MEDIUM
PERFORMANCE	Medium	Medium	Medium	MEDIUM
OVERALL				MEDIUM

FINDINGS

CRITERION	RATING	COMMENT
1. BUSINESS INTEGRITY		
1.1 Legal Compliance	Conformance	The Entity has developed and implemented systems, procedures and processes that conform to ASI Performance Standard's legal compliance requirements. The General Manager takes overall responsibility for legal compliance. The Entity holds ISO 14001, ISO 45001, and ISO 50001 certification and has implemented systems (e.g., a legal database and qualified legal advisers) to maintain awareness of and ensure Compliance with Applicable Law.
1.2 Anti-Corruption	Conformance	The Entity has issued an Anti-Corruption guideline and communicated it internally and externally (at the parent company's website: https://alu-met.com/standorte). The risk of Corruption is analysed, evaluated, and periodically reviewed. Employees are made aware of the Code of Conduct and Anti-Corruption guidelines at the time of recruitment.
1.3a-e Code of Conduct	Conformance	The Entity has issued and communicated a 'social standards' document and an Anti-Corruption guideline, including principles relevant to environmental, social and governance performance. The Entity's Workers receive Anti-Corruption training. The documents are available on the parent company's website: https://alu-met.com/standorte Metal purchasing is conducted by the parent company Alu-met GmbH, not by the Entity.
2. POLICY AND MANAGEMENT		
2.1a-f Environmental, Social, and Governance Policy	Conformance	The Entity has issued and communicated a Company Policy statement and further Policy documents, addressing environmental, social and governance topics. They are communicated internally and externally. The documents are available at: https://alu-met.com/standorte The Policies are periodically reviewed. Training is provided to Workers as applicable.
2.2a-c Leadership	Conformance	The Entity's General Manager has the ultimate responsibility and authority to ensure conformance with the ASI Performance Standard and to ensure sufficient resources to support its implementation. They are supported by the Head of Quality as an ASI representative for Alu-met Group. Interviews, a site tour and document reviews confirmed that senior management provides the resources needed to fulfil the requirements of the ASI Performance Standard, including training of Workers.
2.3a Environmental and Social Management Systems - Environmental	Conformance	The Entity has documented and implemented an integrated Management System certified against ISO 14001:2015 and ISO 50001:2018 (as well as ISO 9001 and ISO 45001): https://alu-met.com/downloads There are no outstanding open actions from the latest audit report issued by the certification body.

CRITERION	RATING	COMMENT
2.3b Environmental and Social Management Systems – Social	Conformance	The Entity is ISO 45001:2018 certified and has implemented an integrated Management System. This includes a focus on human and labour rights.
2.4a-e Responsible Sourcing	Conformance	<p>The Entity's parent company Alu-met GmbH has implemented a Sourcing Policy "Verantwortungsvolle Beschaffung" (Responsible Sourcing) in German, available at: https://alu-met.com/standorte/#ifancybox/caebld84</p> <p>The Entity does not source metal itself as this is carried out by their parent company, which has implemented a process for supply-chain-related risk identification and assessment.</p>
2.5a-g Environmental and Social Impact Assessments	Conformance	The site is located in a highly regulated country (Austria), where relevant projects and changes (linked to construction activities) must undergo a thorough analysis and authorisation process and the Entity has a process in place to manage this. Larger projects or Major Changes to existing Facilities that would have to trigger a social Impact Assessment have not taken place since the Entity joined ASI. The latest project with environmental impact was the installation of a primary melting furnace with heat recovery. Environmental impacts were assessed during the permitting process.
2.6a-h Human Rights Impact Assessment	Not Applicable	This Criterion is not applicable to the Entity, as no New Projects or Major Changes have taken place since the Entity joined ASI. The nature and size of projects and changes to existing Facilities did not require the undertaking of a Human Rights Impact Assessment. However, the Entity has defined criteria for larger projects and Major Changes.
2.7a-f Emergency Response Plan	Conformance	The Entity has developed site specific Emergency Response Plans, in collaboration with relevant Stakeholders such as the local fire brigade. The Entity also holds ISO 14001 and ISO 45001 certifications. As confirmed during the site visit, emergency equipment is in place and employees receive periodic training. Emergency plans are not publicly available, but agencies and relevant Stakeholders have access to them upon request.
2.8a-d Suspended Operations	Conformance	The Entity has established emergency plans and any associated situations where it may have to suspend or significantly alter operations due to factors outside its control. The Entity's management concluded that there was currently no need for action beyond existing measures.
2.9a-b Mergers and Acquisitions	Conformance	The Entity has not undergone or planned Merger or Acquisition (M&A) activity since the Entity joined ASI. Mergers and Acquisitions would be managed by the Entity's parent company Alu-met GmbH, which has a process established to manage M&As, should it become relevant.
2.10a-b Closure, Decommissioning and Divestment	Conformance	<p>The Entity is not the owner of the production Facility but does rent the site from another company of the owner. The closure terms are defined in a rental agreement. Management confirmed that, at the time of the Audit, there were no plans for closure/decommissioning.</p> <p>The site is located in a highly regulated country (Austria), where relevant projects and changes (including closure and decommissioning) must undergo a thorough analysis and</p>

CRITERION	RATING	COMMENT
		authorisation process and the Alu-met group has systems in place to manage this effectively.
3. TRANSPARENCY		
3.1a-b Sustainability Reporting	Conformance	The Entity's Sustainability Reporting is included in the reports of their parent company, Alu-met GmbH. Alu-met GmbH has published its 2022/2023 Sustainability Report, which outlines its governance approach and assesses the Material environmental, social, and economic impacts on the audited Entity and its Aluminium Gießerei Nachrodt plant. The Report is based on GRI Criteria. The Report is publicly available at: https://alu-met.com/standorte
3.2 Non-compliance and Liabilities	Conformance	The Entity's parent company (Alu-met GmbH) has publicly disclosed information on fines. As confirmed by the Entity's management, there were no fines or similar payments made during the reporting period or within the current year of the ASI Audit. In Alu-met's Sustainability Report, specifically section 3.8 (available at https://alu-met.com/standorte), confirms that in both 2022 and 2023, no penalties – whether fines or non-monetary sanctions, were imposed on Alu-met or its two foundries for Non-Compliance with laws and regulations.
3.3a-c Payments to Governments	Conformance	In its biannual Sustainability Report, the Alu-met Group has publicly reported on its governance approach regarding environmental, social, and economic impacts. The Report states that during the reporting period, no payments or in-kind contributions were made to political parties, politicians or political associations.
3.4a-f Stakeholder Complaints, Grievances and Requests for Information	Conformance	The Entity has established accessible Complaints Resolution Mechanisms to address Stakeholder complaints, grievances and requests for information relating to its operations. A dedicated email address (help@alu-met.com) is available to all Stakeholders, and a complaint mailbox has been created to allow for anonymous Worker complaints. Stakeholders also have the option to reach out directly to senior management. The Entity's parent company has provided publicly available information about the Grievance Mechanism in German, English and Italian at: https://alu-met.com/standorte
4. MATERIAL STEWARDSHIP		
4.1a Environmental Life Cycle Assessment	Conformance	The Entity has evaluated the life cycle impacts of its Products and published the data in an Environmental Product Declaration, available at: www.ibu-epd.com and https://www.alu-met.com/fileadmin/daten/pdf/Zertifikate/EPD_Alumet_Aluminium-Strangpressbolzen.pdf
4.1b-c Environmental Life Cycle Assessment - Disclosure	Conformance	The Entity's Environmental Product Declaration (EPD) (Nr. EPD-ALU-20200021-IBBI-DE) published by Alu-met GmbH is available at: https://www.alu-met.com/fileadmin/daten/pdf/Zertifikate/EPD_Alumet_Aluminium-Strangpressbolzen.pdf The EPD contains details of the boundaries, underlying assumptions and data sources.
4.2 Product Design	Not Applicable	This Criterion is not applicable to the Entity's Certification Scope.

CRITERION	RATING	COMMENT
4.3a-b Aluminium Process Scrap	Conformance	The Entity has developed and implemented processes that allow for the physical separation of different alloys and grades of Aluminium. All Scrap is recycled. The effectiveness of these processes was observed during the site tour. As confirmed by interviews, document review and the site tour, the Entity has a program in place to recycle about 100% of its Aluminium Process Scrap, either within its o site, within Alu-met GmbH, or, in case of Dross with external partners.
4.4a-c Collection and Recycling of Products at End of Life – Material Conversion and other Manufacturing	Not Applicable	This Criterion is not applicable to the Entity's Certification Scope.
4.4d Collection and Recycling of Products at End of Life	Conformance	The Entity closely co-operates with collection and recycling systems to support accurate measurement and efforts to increase recycling rates for their Products. As a recycling/remelting operation, the Entity has close contacts with recycling systems, as confirmed by their supplier list.
5. GREENHOUSE GAS EMISSIONS		
5.1a-b Disclosure of GHG Emissions and Energy Use	Conformance	<p>The Entity accounts for and publicly discloses its Material Greenhouse Gases (GHG) emissions and energy use by source on an annual basis. GHG emissions are detailed in the 2022/23 Sustainability Report (page 24). Site specific data are provided for Scope 1 and Scope 2 (direct and indirect emissions). The report is available at: https://alu-met.com/downloads</p> <p>The Entity has implemented and maintains an Energy Management System in accordance with ISO 50001:2018 which has been certified by an accredited certification body. The specific carbon footprint ('cradle-to-gate') is stated in a publicly available Environmental Product Declaration (EPD): https://www.alu-met.com/fileadmin/daten/pdf/Zertifikate/EPD_Alumini-Strangpressbolzen.pdf.</p>
5.2a Aluminium Smelter GHG Emissions Intensity – Started production after 2020	Not Applicable	This Criterion is not applicable to the Entity's Certification Scope.
5.2b Aluminium Smelter GHG Emissions Intensity – In production up to and including 2020	Not Applicable	This Criterion is not applicable to the Entity's Certification Scope.
5.3a-e GHG Emissions Reduction Plans	Conformance	<p>The Entity has defined specific reduction targets as part of its annual environmental/energy program. The program undergoes an internal review each year, together with an evaluation by an auditor from an accredited certification body. The GHG emissions reduction targets are published in the Group's Sustainability Report, section 3.4.1.1: https://alu-met.com/downloads</p> <p>In the published Environmental Product Declaration, the specific CO₂ footprint ('cradle-to-gate') is below 2.0/t per tonne Aluminium: https://alu-met.com/downloads</p>

CRITERION	RATING	COMMENT
		The Report also provides the Entity's long-term GHG Reduction Pathway.
5.4 GHG Emissions Management	Conformance	The Entity has implemented an effective environmental and Energy Management System in accordance with ISO 14001 and ISO 50001 and continuously improves the reduction of emissions and energy use. Certificates are available at: https://alu-met.com/downloads/#Zertifikate
6. EMISSIONS, EFFLUENTS AND WASTE		
6.1a-f Emissions to Air	Conformance	The Entity measures relevant emissions continuously or does so at regular intervals. Results are reported annually to the relevant authority. A summary of dust, GHG and other relevant emissions can be found in Alu-met's 2022/23 Sustainability Report, section 3.5.1: https://alu-met.com/downloads During the reporting period, emissions remained within statutory limit values.
6.2a-g Discharges to Water	Conformance	The Entity does not directly discharge effluent into waterways, including creeks or rivers. Instead, effluent is treated at a publicly owned wastewater treatment plant and wastewater is analysed daily. The Entity has disclosed its discharges to water in its 2022/23 Sustainability Report, specifically in section 3.5: https://alu-met.com/downloads An external expert report confirmed that there were no Material impacts from water extraction. Therefore, a minimisation plan is not required at this time.
6.3a-g Assessment and Management of Spills and Leakages	Conformance	In accordance with its certified Environmental Management System under ISO 14001, the Entity has identified and evaluated risks related to Spills and Leakages. It has established management and external communication plans, compliance controls and a monitoring programme to prevent and detect such incidents. Emergency plans and equipment are readily available. As no Material Spills or Leakages occurred during the reporting period, the Entity did not publish a management plan to remediate Spills or Leakages. Further information can be provided upon request by relevant Stakeholders.
6.4a-b Public Disclosure of Spills and Leakages	Conformance	The Entity reports annually on Spills or Leakages of harmful substances in its 2022/23 Sustainability Report, section 3.7, page 36: https://alu-met.com/standorte/ . There were no significant releases of substances during the reporting period or up to the time of the Audit.
6.5a-c Waste Management and Reporting	Conformance	In accordance with its Environmental Management System under ISO 14001, the Entity has assessed the impacts related to its Waste and has implemented a Waste management strategy that is based on the Waste mitigation hierarchy. The Entity has publicly disclosed the quantities of its generated Waste (both hazardous and non-hazardous) in its 2022/23 Sustainability Report, section 3.6, pages 33-34, which is accessible at: https://alu-met.com/downloads/#informationen
6.6a-g Bauxite Residue	Not Applicable	This Criterion is not applicable to the Entity's Certification Scope.

CRITERION	RATING	COMMENT
6.7a-f Spent Pot Lining (SPL)	Not Applicable	This Criterion is not applicable to the Entity's Certification Scope.
6.8a-d Dross	Conformance	The quantity of generated Dross is a key performance indicator for the Entity and is recorded for each batch. The Entity collects all recovered Dross and stores it in a designated area before shipping it to an external recycling Facility. The Dross is not landfilled. Residues from the Dross recycling (Salt Slag) are recycled by another recycler.
7. WATER STEWARDSHIP		
7.1a-b Water Assessment and Disclosure	Conformance	The Entity has assessed water-related risks in Watersheds which is supported by an assessment undertaken by an external independent expert. The evaluations did not identify significant risks. Data on water usage are publicly available in the annual Sustainability Report 2021, section 3.4, page 24: https://alu-met.com/downloads
7.2a-e Water Management	Not Applicable	This Criterion is not applicable, as the water-related risk assessment was rated as low.
8. BIODIVERSITY AND ECOSYSTEM SERVICES		
8.1a Biodiversity and Ecosystem Services Risk and Impact Assessment	Conformance	The Entity has engaged an external consultancy firm to assess the risk to, and potential impacts on Biodiversity and Ecosystem Services resulting from the land use and activities within the Entity's Area of Influence. A report was developed and although major risks have not been identified, a Biodiversity Action Plan has been established.
8.1b Biodiversity and Ecosystem Services Risk and Impact Assessment - Priority	Not Applicable	This Criterion is not applicable, as the Entity's biodiversity assessment rated the risks to Ecosystem Services as low.
8.2a-g Biodiversity Management	Conformance	The Entity has conducted a biodiversity assessment which identified no major impacts. However, a biodiversity action plan has been endorsed and funded by management and its implementation is ongoing. Implemented measures from the Action Plan are publicly available at: https://alu-met.com/standorte/#fancybox/f59596fc
8.3a-c Management of Priority Ecosystem Services	Not Applicable	This Criterion is not applicable to the Entity, as due to the size and nature of the business as an Aluminium re-melter and that no Priority Ecosystem Services have been identified.
8.4 Alien Species	Conformance	The Entity works to prevent and mitigate the introduction of Alien Species. During the Entity's thermal processing of the Aluminium scrap, all species contained in the Scrap are destroyed. As a measure to protect their site and the surrounding area against neophytes (which may be brought in by vehicles), the factory area is cleaned of neophytes annually.
8.5a-b Commitment to 'No Go' in World Heritage Properties	Conformance	The Entity is not located in or near World Heritage Properties, as confirmed by the site visit and the UNESCO World Heritage Map (see https://whc.unesco.org/en/statesparties). The Entity has implemented

CRITERION	RATING	COMMENT
		a process to ensure that New Projects are not explored or developed in World Heritage Properties.
8.6a-d Protected Areas	Conformance	<p>Protected Areas in the vicinity of the site include a meadow area known as "Streuwiesenbiotopverbund Rheintal - Walgau". Other notable biotopes in the vicinity (500 - 1000m) include the alluvial forests and the moor grass meadows on the river Ill in the southeast, as well as rough meadows in the northeast. For more information see: http://apps.vorarlberg.at/archiv/umweltschutz/biotopinventar/Schllins.pdf and https://atlas.vorarlberg.at/portal/map/Natur and https://vorarlberg.at/-/biotopinventar-vorarlberg.</p> <p>The Entity's impact on these areas has been assessed in a biodiversity study which did not identify any Material impact on these Protected Areas and biotopes.</p>
8.6e Protected Areas – Bauxite Mining	Not Applicable	This Criterion is not applicable to the Entity's Certification Scope.
8.7a-i Mine Rehabilitation	Not Applicable	This Criterion is not applicable to the Entity's Certification Scope.
9. HUMAN RIGHTS		
9.1a-d Human Rights Due Diligence	Conformance	<p>The Entity's parent company Alu-met has issued a company Policy and a 'social standards' document, expressing a commitment to respect Human Rights. Both documents apply to the Entity in full. The Documents are available at: https://alu-met.com/standorte</p> <p>The Entity has conducted a documented Human Rights Due Diligence assessment. The assessment did not identify any salient issues regarding Human Rights, which was confirmed by interviews at the Audit.</p>
9.2a-e Gender Equity and Women's Empowerment	Minor Non-Conformance	<p>Women's rights are addressed in Alu-met's Code of Conduct, which has been communicated to all employees and is available at: https://alu-met.com/standorte</p> <p>The Entity has conducted a documented analysis of its status regarding gender equity and women's empowerment, identifying and initiating initial actions. However, it has not yet established a formal program to promote gender equity.</p>
9.3a-i Indigenous Peoples	Not Applicable	This Criterion does not apply to the Entity, as Indigenous Peoples or their lands, territories and resources are not present where they operate.
9.4a Free, Prior, and Informed Consent (FPIC) - New Projects or Major Changes	Not Applicable	This Criterion does not apply to the Entity, as Indigenous Peoples or their lands, territories and resources are not present where they operate.
9.4b Free, Prior, and Informed Consent (FPIC) - Bauxite Mining	Not Applicable	This criterion is not applicable to the Entity's Certification Scope.

CRITERION	RATING	COMMENT
9.4c Free, Prior, and Informed Consent (FPIC) - Demonstrate support	Not Applicable	This Criterion does not apply to the Entity, as Indigenous Peoples or their lands, territories and resources are not present where they operate.
9.5a Cultural and Sacred Heritage – Identification	Conformance	The Entity has assessed sacred or cultural heritage sites and values within its Area of Influence. One site was identified. Vorarlberg, the administrative region where the site is situated, does not have incorporate any World Heritage sites. However, the "Bregenzerwald" region, which is the nearest relevant site, has been included in the list of World Heritage candidate sites since 1994.
9.5b Cultural and Sacred Heritage – Impacts	Not Applicable	This Criterion does not apply to the Entity, as Indigenous Peoples or their lands, territories and resources are not present where they operate.
9.6a-i Displacement	Not Applicable	This Criterion does not apply to the Entity, as no resettlements have taken place during the period since joining ASI, nor are expected to occur during the Certification Period.
9.7a-h Affected Populations and Organisations	Conformance	The Entity has conducted a Human Rights Due Diligence assessment to assess whether the rights and interests of Affected Populations and Organisations are respected regarding their lands, livelihoods, and use of natural resources. The outcome of this assessment has confirmed that there are no issues or concerns relevant to the Local Community, and therefore there is no need for action. Stakeholder interviews confirmed that the Entity has a sound relationship with the local community.
9.8a Conflict-Affected and High-Risk Areas - Strong Management Systems	Conformance	The Aluminium (primary and Scrap material) is sourced by the Entity's parent company Alu-met GmbH, rather than by the Entity itself. The parent company has implemented a risk-based Due Diligence process for its Aluminium supply chain, which includes systematic identification and assessment of risks in the supply chain. Responsibility for supply chain Due Diligence is assigned within Alu-met.
9.8b Conflict-Affected and High-Risk Areas - Identify and assess risks	Conformance	The Entity's parent company, Alu-met GmbH, has implemented a risk-based Due Diligence process for its Aluminium supply chain, which includes systematic identification and assessment of risks throughout the supply chain, encompassing both suppliers of Aluminium Scrap and primary Aluminium.
9.8c Conflict-Affected and High-Risk Areas - Strategy to respond to risks	Conformance	The Entity's parent company Alu-met GmbH has implemented a process for risk-based Due Diligence for its Aluminium supply chain which includes systematic identification and assessment of risks in the supply chain. A strategy to respond to identified risks is established by the parent company Alu-met.
9.8d Conflict-Affected and High-Risk Areas - Audit of due diligence	Conformance	The ASI Performance Standard Re-Certification Audit in June 2023 fulfilled the requirement of this Criterion.
9.8e Conflict-Affected and High-Risk Areas – Report annually	Conformance	Both primary and Scrap Aluminium is sourced by the Entity's parent company, Alu-met GmbH, rather than by the Entity itself. The Entity has publicly reported on the process and results of its supply chain Due

CRITERION	RATING	COMMENT
		Diligence, which is available in Alu-met's 2022/23 Sustainability Report, section 1.6 at: https://alu-met.com/downloads/#informationen
9.9 Security practice	Not Applicable	This Criterion is not applicable, as the Entity does not employ security staff at their site.
10. LABOUR RIGHTS		
10.1a-c Freedom of Association and Right to Collective Bargaining	Conformance	The Entity respects the rights of Workers to unite freely in unions and seek representation without interference even though there is no elected worker representation in place at the site level. As confirmed by interviews with Workers and management, the Entity takes an open attitude towards the election of a works council. The Entity also respects the rights of Workers to Collective Bargaining. The Entity is a member of the employers' industry association (Wirtschaftskammer) and have negotiated Collective Bargaining agreements with the union and Workers association (Arbeiterkammer) at the national industry branch level.
10.1d Freedom of Association and Right to Collective Bargaining - Alternative means in context of Applicable Law	Not Applicable	This Criterion does not apply to the Entity, as Applicable Law allows for the right to Freedom of Association and Collective Bargaining in Austria.
10.2a Child Labour	Conformance	As confirmed by interviews with Workers and management, the Entity does not employ minors under the age of 15 years. The Entity has implemented practices to ensure that children are not employed. The youngest worker employed was over 18 years old at the time of the Audit. The 'social standards' document, issued by Alu-met, addresses the prohibition of Child Labour, available at: https://alu-met.com/standorte
10.3a-c Forced Labour	Conformance	The Entity neither engages in, nor supports the use of Forced Labour. It does not participate in or support Human Trafficking, either directly or through any employment or recruitment agencies. This was confirmed through site observations, interviews with Workers and management, and document review. The Entity's Social Standards (Sozialstandards) Policy, prohibits Forced Labour and is available at: https://alu-met.com/standorte The Entity has issued a Modern Slavery Statement, which can be accessed at: https://alu-met.com/standorte/
10.4a-c Non-Discrimination	Conformance	The Entity is committed to non-Discrimination and communicates this commitment in its Social Standards (Sozialstandards) Policy. The Entity's risk assessment addressed Discrimination and there is no Discrimination in pay for equal work. As confirmed by interviews there is no Discrimination in pay for equal work. The Entity also does not engage in, nor support Discrimination.
10.5 Communication and engagement	Conformance	As confirmed by interviews and a Document review, the Entity ensures open communication and direct engagement with Workers. Nominated Workers function as safety representatives (Sicherheitsvertauenspersonen), a joint Health and Safety committee

CRITERION	RATING	COMMENT
		is established, and an anonymous letter box for raising suggestions or concerns is available. Workers meet daily with their superiors to discuss work related issues. Due to the small number of Workers, the Entity practices an 'open door Policy' rather than institutionalised systems for employee engagement.
10.6a-g Violence and Harassment	Conformance	As confirmed by interviews and a document review, the Entity neither engages in, nor tolerates the inadequate or unacceptable treatment of Workers. The publicly available Policy states management's commitment to respecting Human Rights and confirms that the Entity does not tolerate Violence or Harassment in the workplace. This commitment is available at: https://alu-met.com/standorte
10.7a-d Remuneration	Conformance	The Entity respects the rights of Workers to receive a living wage and ensures that wages paid for a normal working week meet the industry standard. This was confirmed via document review and Worker interviews. Remuneration is provided according to the industry-wide Collective Bargaining agreement and is always above the national minimum wage. Wage payments are timely, in legal tender and fully documented. Payments are made via transfer to employees' bank accounts and pay slips are provided to employees, which are detailed and legible. Overtime is paid with a premium of at least 25%.
10.8a-c Working Time	Conformance	The Entity follows Applicable Law and industry standards on Working Time, public holidays and paid annual leave. Working Time is regulated in the branch Collective Bargaining agreement and is incorporated in each employment contract. A 'clocking-in' system is in place and records are available. Overtime is voluntary and due to the shift system; it is quite limited. The average Working Time of production is 40 hours/week.
10.9a-b Informing Workers of Rights	Conformance	As confirmed through interviews and document review, Workers receive training regarding Occupational Health and Safety (OH&S) but also about ASI principles and labour law during induction training and through annual refresher training. All employees can also contact the Chamber of Labor ("Arbeiterkammer") for information and advice.
11. OCCUPATIONAL HEALTH AND SAFETY		
11.1a Occupational Health and Safety (OH&S) Management System	Conformance	The Entity is certified to ISO 45001:2018 by an accredited certification body. The Entity has implemented and communicated its Occupational Health and Safety (OH&S) Policy.
11.1b-e Occupational Health and Safety (OH&S) Management System - Reviews and disclosure	Minor Non-Conformance	The Entity is ISO 45001 certified, and the effectiveness of its OH&S Management System is reviewed annually. Leading and lagging OH&S performance indicators are monitored regularly. However, it was identified that the Entity's OH&S performance indicators are not made publicly available, which has also resulted in the non-publication of a comparative analysis of its performance against peer business.
11.2 Employee engagement on Health and Safety	Conformance	The Entity is ISO 45001:2018 certified by an accredited certification body. In line with national law, a Health and Safety committee has been established, in which Workers and safety specialists participate.

CRITERION	RATING	COMMENT
		All Workers can issue 'safety notices' to inform management about perceived safety issues.

ASI LIMITATION OF LIABILITY DISCLAIMER

Organisations that make ASI-related claims are each responsible for their own compliance with Applicable Law, including laws and regulations related to labelling, advertisement, and consumer protection, and competition or antitrust laws, at all times. ASI does not accept liability for any violations of Applicable Law or any infringement of third-party rights (each a Breach) by other organisations, even where such Breach arises in relation to, or in reliance upon, any ASI Standard, document or other material, recommendation or directive issued by or on behalf of ASI. ASI gives no undertaking, representation or warranty that compliance with an ASI Standard, document or other material, recommendation or directive issued by or on behalf of ASI will result in compliance with any Applicable Law, or will avoid any Breach from occurring.
